**LETTER OF RECOMMENDATION**

To whom it may concern,

I am writing this letter in regard to our employment with Mr Vo Ngoc Sang, who joined us on July 15th, 2022 as an intern, and became our staff as an AI/Machine Learning engineer three months later.

At a glance at Sang's curriculum vitae, I was totally impressed by the achievements that he had received during his studying time at the university. Sang turned out to have an interest in the field of Artificial Intelligence, as evidenced by so many projects that he was doing with his professor.

Through my observation, Sang was an incredibly hard-working, determined person, who always tried his best to perform at work. During the internship period, not only was Sang sensitive to the job, but he was also an open-minded person, who always was willing and never hesitated to ask his mentor whenever he encountered problems, which is the very attitude that I really like from him, making him one of the most outstanding interns and then become our staff later.

When I knew that Sang had the plan to pursue a Master's program in a foreign country, I felt happy for him and believed that he would have a bright future with his decision.

For that reason, I would like to recommend Sang as a good candidate for your University as a student in the Master's program. This is a natural and reasonable move for him in his career path and being his employer, we are expressing our full support on this.

Should you need further information or have questions, please do not hesitate to contact me.

Yours Sincerely,

Tran Xuan Thuong
