## TESTIMONIAL

Mr. Vo Ngoc Sang was a participant of TFISCALE (Temasek Foundation International Specialists' Community Action and Leadership Exchange) 2022 programme, which comprises of an Inbound programme from 4-17 Sep 2022 and an Outbound programme from 5-18 Mar 2023.

I have the pleasure of knowing Sang for more than six months through the programme. Throughout the program, Sang has displayed remarkable qualities such as diligence, enthusiasm, and energy, combined with a strong sense of responsibility and excellent leadership skills.

Sang also demonstrated the qualities of a leader for our ASEAN community. His leadership skills were showcased throughout the programmes, including academic activities, field trips, group projects, and organizing and planning outings in both Singapore (Inbound) and Vietnam (Outbound). Sang led the team to achieve outstanding results in the project works during both programmes (inbound and outbound). During the programmes, Sang contributed innovative, precise, and well-organized ideas during field trips and lectures. He concluded his projects with a well-presented presentation delivered in excellent English and unwavering confidence.

In addition, Sang has also demonstrated excellent communication and interpersonal skills. He was able to effectively communicate and collaborate with teammates from two countries and cultures, fostering a positive and inclusive environment. His ability to connect with others from diverse backgrounds will be a valuable asset in any professional setting. His confidence and determination to be the best that he can be, is a demonstration of his potential to succeed in life.

I wish him every success in his future endeavours.
